

An impressive home, designed for construction on low grade slopes. Light entering from a variety of directions, multi-level floors and different room heights create a fascinating rhythm while delineating areas for various household functions. A long view through the centre of the home provides an exceptional feeling of space. A loft under the highest part of the home is perfect for both play and rest. The home offers great flexibility in its floor plans. For example, open areas can be changed to make a bedroom.

GROUND AREA 150.0m²
+ loft 29.0m² excluding terrace

TOKYO
